## SNOWPLOWS

***Maximize your plowing with a JJAG Wing Snowplow  
Giving you more snow clearing capacity – saving you time and money.***

JJAG Wing is a highly adaptable, lightweight, cost-effective and time-efficient snow removal tool that no municipal, commercial or private plow operator should be without.

Whether you plow city streets or unpaved country roads, winding neighborhood streets or wide open parking lots, JJAG Wing will increase your clearing capacity and significantly decrease time and costs.

### ► JJAG Wing Features

- Stretches clearing by more than 4.5 feet
- Clears snow 40% faster
- Decreases fuel consumption
- Decreases maintenance costs
- Shelves snow banks
- Tucks close to your truck body
- Lightweight design

## STORED POSITION

# JJAGWING

## SNOWPLOWS

## EXTENDED POSITION

### **The Art...and Mechanics...of Snow Removal**

JJAG Wing is arced to first roll and then throw snow over banks as it leaves our blade's edge. This means snow banks don't build up as quickly – and that equals increased safety and efficiency.

#### **CAB CHASSIS SPECS:**

**Blade:** Full Trip – 8'

**Blade Height:** 28.5'

**Blade Color:** Red or Yellow

**Blade Extension:** 4'6" (from wheel)

**Blade Retracted:** 11" (from body)

**Stowed Height:** 13'

**Complete Weight:** Approx. 600 lbs

**Power Unit:** Hyd. Or Central Hyd.

### **Tucks Tight, Sits High**

Fully independent from your front plow, JJAG Wing has its own hydraulic system which raises, lowers, extends and retracts its side mounted blade. In the stored position the JJAG Wing sits 12" off the road surface and hugs the side of your vehicle presenting a profile that's less than 11" and that doesn't extend beyond your truck's rear bumper.

### **Shelves Banks**

JJAG Wing is also the only plow of its kind that allows shelving of banks. Fully extended, in the raised position, JJAG Wing can cut a shelf as deep as 4' 6" and as high as 18".

### **Full Trip System Protection**

JJAG Wing features a full trip blade system which allows it to trip forward over solid obstructions. JJAG Wing also features hydraulic cushion valves that allow the blade to safely collapse toward the vehicle when making contact with a solid obstruction that is greater than the trip height of the blade.

### **Removes in Seconds**

Even when mounted the JJAG Wing allows for complete access to your dump box and trailer hitch. But should you need to remove JJAG Wing, our custom mounting system ensures that disconnecting JJAG Wing is as effortless as plowing with it. Simply remove the two mounting pins using one to secure the lift arm, release the attachment hitch, disconnect your hydraulic hoses and you're done.
